Test 1 — Fully Covered

- **User Question:** How do I reset my password?
- **Expected Behavior:** Provide four numbered steps from `it_faq.md`, cite the relevant FAQ heading, and avoid inventing instructions.
- **Actual Response:** The assistant provided four numbered password-reset steps, cited `it_faq.md – How do I reset my password?`, and included password requirements cited to `it_policy.md – Password Policy`.
- **Result:** PASS (pending source-content verification)
- **Notes:** The response follows the expected four-step format and provides citations for both the reset process and password rules. Verify the details against the source files.

Test 2 — Partially Covered

- **User Question:** My laptop screen is cracked, what do I do?
- **Expected Behavior:** Provide the documented reporting email and walk-in desk hours, explicitly state that detailed repair steps are not covered, and cite the relevant FAQ section.
- **Actual Response:** The assistant provided the IT support email, asset tag reporting requirement, walk-in desk location and hours, and explicitly stated that detailed repair instructions are not included in the available IT documentation. It directed the employee to IT support for further assistance.
- **Result:** PASS
- **Notes:** The updated instructions resolved the missing-information issue. The assistant provided documented information without inventing repair procedures.

Test 2 — Partially Covered: Hardware Issues

Test Requirement	Actual Output Evaluation	Result
Provide IT support email	Provided `it-support@artscape.com`	PASS
Provide walk-in desk hours	Provided 3rd floor, 10 AM–4 PM on weekdays	PASS
Cite `it_faq.md`	Cited the relevant hardware issues FAQ section	PASS
Explicitly state repair steps are not covered	Not mentioned in the initial response	FAIL
Avoid inventing repair instructions	No repair instructions were invented	PASS

Overall Result: FAIL — needs improvement.

Issue Identified: The initial response provided the IT support contact details and walk-in hours but did not explicitly state that detailed repair instructions were not covered by the available documentation.

Corrective Action: Updated the instruction block to require the assistant to identify missing information for partially covered topics and avoid inventing repair procedures.

Retest Result: PASS.

Retest Notes: The updated response provided the documented IT support email and walk-in desk hours, cited the relevant `it_faq.md` section, explicitly stated that detailed repair instructions were not available in the documentation, and directed the employee to IT support for further assistance.

Retest — Test 2: Partially Covered Hardware Issue

- **Question:** My laptop screen is cracked, what do I do?
- **Initial result:** FAIL
- **Issue identified:** The initial response did not explicitly state that detailed repair instructions were missing.
- **Corrective action:** Updated the instruction block to require a clear explanation of missing information for partially documented topics.
- **Actual retest response:** Provided the IT support email, walk-in support location and hours, and an explicit statement that detailed cracked-screen repair instructions are not covered.
- **Retest result:** PASS
- **Notes:** The updated response met all expected requirements and cited the relevant `it_faq.md` section.

Test 3 — Not Covered: Wi-Fi Troubleshooting

Expected Requirement	Actual Output Evaluation	Result
Does not guess why Wi-Fi is slow	The assistant did not diagnose or guess the cause.	PASS
Acknowledges missing documentation	The assistant stated that the topic is not covered in the current IT documentation.	PASS
Directs employee to IT support	Provided `it-support@artscape.com`.	PASS
Explicitly states that network diagnosis is not covered	The response did not explicitly mention that Wi-Fi troubleshooting and network diagnosis are not documented.	FAIL

Avoids inventing a source citation	The assistant did not invent a source citation.	PASS

Initial Test Result: FAIL — needs improvement.

Issue Identified: The response correctly acknowledged that the topic was not covered and directed the employee to IT support. However, it did not explicitly identify Wi-Fi troubleshooting or network diagnosis as missing from the documentation.

Corrective Action: Updated the instruction block to require the assistant to state clearly when a topic or diagnostic procedure is not covered by the available IT documentation.

Retest Expected Behavior: The assistant should not diagnose the Wi-Fi issue, should explicitly state that the available documentation does not cover Wi-Fi troubleshooting or provide enough information to diagnose the problem, and should direct the employee to `it-support@artscape.com`.

Retest Result: Pending retest.

Notes: Run Test 3 again after updating the instructions. Record the actual response and mark PASS only if all expected requirements are satisfied.

Retest — Test 3: Undocumented Wi-Fi Issue

- **Question:** Why is the office Wi-Fi so slow today?
- **Initial result:** FAIL
- **Issue identified:** The initial response did not explicitly explain that the available documentation lacked enough information to diagnose the network issue.
- **Corrective action:** Updated the instruction block with a specific rule for undocumented network issues.
- **Actual retest response:** "The available IT documentation does not contain enough information to diagnose this network issue. Please contact it-support@artscape.com for assistance."
- **Retest result:** PASS
- **Notes:** The updated response clearly identifies the documentation gap, avoids unsupported diagnosis, and directs the employee to IT support.
